

Electrical appliance safety checks

If in doubt, don't use it!

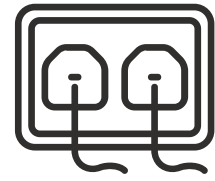

1

Are there any clear signs of breakage to the outer casing, like fractures, cracks, or missing parts?

2

Are any of the appliance's screws loose?

3

Does the plug look damaged in any way?

10

When turned on, does the appliance look, smell, and sound as it should?

9

Are any of its cables wrapped or tangled under or around furniture?

4

Is any part of the cable frayed, split, cracked, burnt or scorched?

8

Is the environment the appliance is in damp or dusty?

5

Does the flex attached to the plug look like it's been burnt, over-stretched, or damaged?

7

Are there any signs of damage to the appliance's socket or fitting, like burn marks or visible internal elements?

6

Are there any signs of over-heating in the area surrounding the appliance?
